

ALEKHYA NIMMALA

B.Sc. Computer Science | Data Science & Machine Learning

7780743751 • alekhyanimmala4001@gmail.com • [LinkedIn](#) • [GitHub](#) • [Portfolio](#)

PROFESSIONAL SUMMARY

B.Sc. Computer Science student with hands-on experience in Python, data analysis, and machine learning, with practical projects involving data preprocessing, exploratory data analysis, visualization, feature engineering, and predictive modeling. Strong self-learner with an analytical and problem-solving mindset seeking internships in Data Science, Machine Learning, Data Analytics, or Python Development.

EDUCATION

Bhaskar Degree College, Andhra University — B.Sc. Computer Science | 2024–2027

CGPA: 8.04/10.00* | Class XII: 90.6% | Class X: 90.3%

*Simple average of Semesters 1–4 SGPA; replace with official CGPA if provided by the college.

TECHNICAL SKILLS

Programming: Python, HTML, CSS

Data Science: Pandas, NumPy, Matplotlib, Seaborn

Machine Learning: Scikit-learn, Regression, Classification, Data Preprocessing, Feature Engineering, Model Evaluation

Database: SQL

Tools: Git, GitHub

Foundations: Statistics, Linux, Exploratory Data Analysis

PROJECTS

Loan Approval Prediction | Python, Pandas, Scikit-learn

- Developed a machine-learning classification pipeline to predict loan approval outcomes.
- Performed data preprocessing, categorical encoding, feature engineering, and feature scaling.
- Compared Logistic Regression, KNN, and Gaussian Naive Bayes; Logistic Regression achieved 88% accuracy and 80.95% F1 score.

Sales Analysis | Python, Pandas, NumPy, Matplotlib, Seaborn

- Analyzed 9,994 sales transactions to identify trends across sales, customers, regions, discounts, and profitability.
- Performed exploratory data analysis and visualization to uncover business trends and patterns.
- Investigated the relationship between discounts, sales, and profitability to generate data-driven insights.

House Price Prediction | Python, Pandas, Scikit-learn

- Built a Linear Regression model for house-price prediction using a structured machine-learning workflow.
- Applied data preprocessing, exploratory data analysis, feature engineering, and model evaluation.

Student Performance Analysis | Python, Pandas, NumPy, Matplotlib, Seaborn

- Conducted exploratory analysis using statistical analysis and visualization to study student performance.
- Examined factors including test preparation, parental education, lunch type, and gender.
- Applied data cleaning and feature engineering to prepare the dataset for analysis.

CORE STRENGTHS

Self-Learning • Quick Learning • Problem Solving • Analytical Thinking • Time Management

LANGUAGES

Telugu • English • Hindi
